The index may be regarded as an approximate measure of changes in the volume of business transactions settled by cheques provided it is considered in conjunction with changes in price levels. It represents the ratio of each month's clearings to the average for the month concerned during the five years 1926–1930. This average is represented by 100 each month. Seasonal fluctuations have thus been eliminated. Casual fluctuations in monthly index numbers have been smoothed out by taking a three months' moving average, that is the index shown above for each month is the average of the actual index of that month and the preceding two months. It may be compared vertically or horizontally.

The index is adjusted to eliminate the effects of Treasury Bill and other special transactions on behalf of Governments and the effects of bank amalgamations. No adjustment has been made for normal growth or change of price levels. The amounts of clearings shown are the recorded totals less Treasury Bill transactions only.

NEW SOUTH WALES.

SECTION E.—GENERAL.

20. EMPLOYMENT IN NEW SOUTH WALES.

Estimates of employment formerly published in this Section were derived from returns of employers in remitting State Wages Tax which ceased in October, 1941. It is not possible now to compile estimates exactly comparable with those formerly based on Wages Tax Returns.

The table now published has been compiled in a new form adapted to the contents of returns made by employers for purposes of Commonwealth Pay-roll Tax which came into operation in July, 1941. Comparative figures for July, 1939, and June, 1933, have been inserted wherever possible in the table shown below. From this data now available it is possible to publish separate totals for males and females.

Although direct comparison is not possible between the figures now published and those formerly compiled for months and years between June, 1933, and July, 1941, the figures published in previous issues of this Monthly Summary for that period are reliable indicators of trend and of numerical change for the period and on the basis indicated in the headings and notes.

(a) Estimated number of wage and salary earners in employment defined as "persons occupied as wage and salary earners" as distinct from "equivalent of full time employment." Employees absent in the defence forces, at home or abroad, and Government relief workers are excluded.

(b) The numbers in columns marked (b) are the total employees on the last pay-roll of each month shown on returns of employers who are taxable. Employees of State, semi-Government, and Local Government authorities are included under "All Employers Furnishing Returns," and in the appropriate industry column when separate returns are supplied, e.g., Railway Commissioner. These group totals are useful as indicating trend, but do not indicate the actual number of employees in the industries named. Commonwealth Government and employers who pay not more than £20 per week in wages are excluded.

21. INDEX OF EMPLOYMENT—NEW SOUTH WALES.

Owing to the incidence of enlistments and entry into wage earning employment of persons not normally wage earners, the index of employment and unemployment has been discontinued since April, 1940. Indexes from June, 1933, to April, 1940, together with a description of the method of compilation, are shown on page 27 of the "New South Wales Statistical Bulletin" for March Quarter, 1941.

26. STOCK EXCHANGE INDEX (SYDNEY).

The following index of the values of the principal Company shares on Sydney Stock Exchange embraces the ordinary shares of companies (excluding banking companies) whose business is conducted wholly or largely in New South Wales.

The prices of individual shares are unweighted, and each group average is the mean of the average monthly prices per £ of paid-up capital. The aggregate index is the average for the whole of the shares included in the groups with the addition of 24 miscellaneous shares. There is no base period as the index represents the ratio per cent. of the average prices of ordinary shares to their par values, adjustment being made where capital is written off or bonus shares are issued.
